(54) Title: **ACID LABILE DRUG COMPOSITIONS**

(57) Abstract: A composition and method of making a pharmaceutical dosage form containing an acid labile drug bound to an ion exchange resin is provided. The composition may be coated with a low acid content enteric coating. The binding of the acid labile drug to the exchange resin stabilizes the drug against acid degradation. The low acid content enteric coating controls the permeability of the enteric coating.
